MEDICAL CAMP FOR PHYSICALLY AND MENTALLY CHALLENGED CHILDREN

Give Hope - Give a Hand
Providing International prosthetic hands to the needy in Pakistan.

LN-4 Prosthetic Hands Distribution International Project by Rotary Multan Cantt.

We provide our LN-4 prosthetic hands to

1. Whoever can benefit
2. Anywhere in the world
3. At no cost to the recipient

KEY FEATURES OF OUR LN-4

- Durable - Simple - Light-weight - Function
- Easy to fit by trained non-medical volunteer
- Volunteer training is less than a day
- No significant maintenance
- No significant unfilled need

LN-4 Qualification

Who can use the LN-4

- About 2 years old and up.
- Minimum 12 centimeters from elbow to end of the residual limb
- No open wounds and no ulcers on the residual limb
- Good flexibility and muscle tone in the arm, joint and residual limb
- Suitable amputees, only one LN-4 hand per amputee

RECOGNITION OF THE PROJECT IN THE ROTARIAN MEGAZINE (ISSUE MAY 2017)

3] PAKISTAN

The Rotary Club of Multan Cantt outfitted 23 people with free prosthetic hands in a program directed by the club's charter president, Salman Mubarak, chief executive of a local hospital. The LN-4 hands, light-weight and durable prosthetics that fit below the elbow, are donated by the Ellen Meadows Prosthetic Hand Foundation in San Francisco. "We took up this project because of the dire need faced by people [who suffer amputations] as a result of accidents, primarily from a primitive machine used to cut fodder for animals" and gangrene resulting from diabetes, Mubarak says. "We are proud of our small but very special achievement."
